

Wash + Shelter Training

Training objectives:

By the end of the training course, participants will be able to:

- Assess community level water and sanitation use and needs based on consumption patterns, cultural norms and availability
- Identify appropriate water and sanitation interventions based on community social, economic, and environmental characteristics
- Develop and carry out a community water supply plan
- Describe major transmission routes of infectious agents
- Describe and apply appropriate strategies to prevent and control infectious disease
- **Shelter**- The primary objective of this presentation is to help participants understand the difference between each type of shelter. Next they are to concentrate on what is a temporary shelter and what are its characteristics.
